1. Introduction of DELPLUS Software:

DELPLUS:

DELNET has developed **DELPLUS** software. Software designed and developed exclusively to work under all kinds of libraries. It is best for small and medium size libraries which have collections up to one lakh holdings. Barcode enabled. This software has modules like Acquisition, Cataloguing, Circulation, Serial Control, Article Indexing, and System Administration. Acquisition modules & Cataloguing Module is utilized for master record keeping, catalogue search through OPAC. The circulation module maintains the status of various items and circulation transactions. Subscriptions and checks on arrival of issues are monitored through serial control. Administrative module is used to create the users and work allotment.

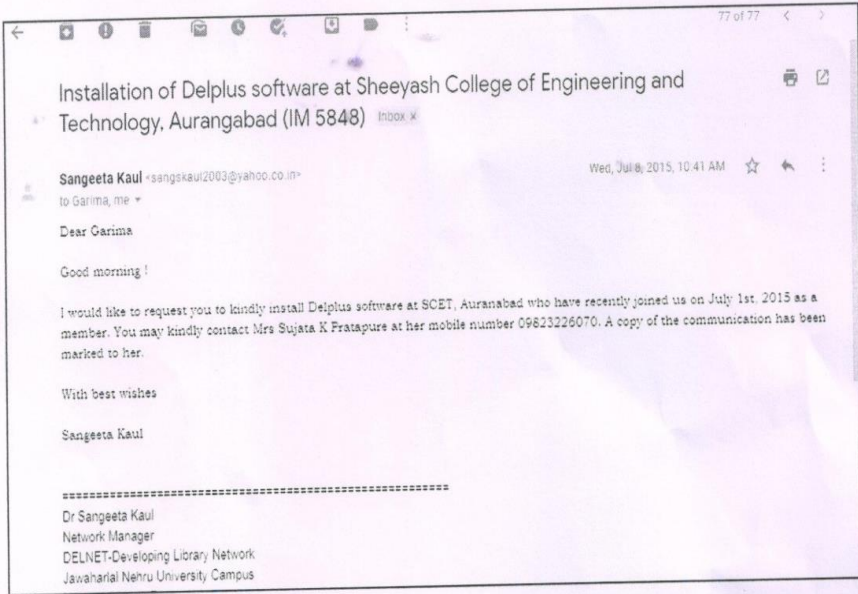

Name of the ILMS Software	Nature of Automation	Version	Year of Automation
DELPLUS	Partially	2.0	2015

This software is easy to work with and comprises the following modules:

- Acquisition
- Cataloguing
- OPAC
- Circulation
- Article Indexing
- Serial Control
