

To,

The Principal
SYCET, Aurangabad

Dt: 23/11/2022

Subject: Permission to organize one-week workshop and provide the fund for experts.

Respected Sir,

With reference to the above subject, I need to say that we are planning to organize a one-week workshop on "3D printing hands-on training and business opportunities" in the Department of Mechanical Engg from 06th December to 09th December 2022. In this regard, I have discussed this with an expert from "Groundup Technologies Pvt. Ltd., Aurangabad. He is ready to bring his 3D printing machine to college and train our students and faculty members. He was asking for Rs. 3000/day for providing hands-on training to students and faculty members.

Therefore, I request to kindly permit us to organize one-week workshop and also provide the fund for experts.

forwarded to CEO
Prof. J. J. J.
23/11/2022

Yours Sincerely

Dr. Hulas A Tonday
HOD
Mechanical Engg.

An amount Rs. 2250/- per day allowed. Negotiate with the agency. Total Rs. 11000/- to be paid, this workshop being a mandatory request.

Act Sec _____

Quotation for 3D Printing Workshop External Inbox x

 **GroundUp Technologies** <groundup.techno1@gmail.com> Mon, Nov 28, 2:45 PM

to me

Greetings!

PFA for Quotation as agreed upon for 3D Printing Workshop and Training.

Also, as requested by Prof. Ulhas, I am attaching the company Logo for your reference to be printed on the certificates.

Thanks and Regards,

Ameya Deshpande
Director

About The Workshop

3D printing is a technology development that creates a physical object from a virtual 3D CAD model by depositing successive layers of materials. This emerging technology is revolutionizing the manufacturing industry with its ability to turn digital data into physical parts. It's distinct ability to manufacture complex shapes and structures has already made it invaluable for producing prototypes such as engine manifolds for the automotive industry and tools such as investment casting moulds in the jewellery and aeronautical industries. This workshop will provide clear and comprehensive coverage of this exciting new technology. Participants will be able to practice 3D printing machine during the workshop.

The College

Shreeyash Pratishthan's Shreeyash College of Engineering & Technology is a centre of excellence for training and imparting knowledge and producing quality engineers in their specialized professional programme. We provide an in-depth education in engineering principles built on mathematics, computation, and the physical and life sciences, and encourage our students to apply what they learn through projects, internships, and research.

We are the First "NAAC ACCREDITED" & ISO-9001:2015 Certified Engineering Institute in the Marathwada region.

is organizing

One Week Hands-on Workshop on 3D Printing and Business Opportunities

5th to 9th Dec, 2022

shreeyashengineering

@shreeyashcoe

<https://sycet.org/>

Objectives

- To provide training and hands-on experience on 3D printing process.
- To train students and faculties about 3D CAD modeling.
- To provide knowledge about business opportunities in the field of 3D printing .
- To provide knowledge about research opportunities in the field of 3D printing

For Registration

<https://forms.gle/LX4WVBu6PzW9ssWR9>

Important Dates

Last date for Registration	04th Dec, 2022
1st Day of Workshop	11:00 AM, 05th Dec
Last Day of Workshop	01:00 PM, 09th Dec
Distribution of e-certificates	03:15 PM, 10th Dec, 2022

Benefits

- e-certificates will be provided to participants.
- A separate Q&A session will be arranged.
- Participants will be able to operate a 3D printing setup.

Hands-on Workshop on 3D printing and Business Opportunities

Contents and Schedule

Speaker: Mr. Ameya V Deshpande

1. Day One – 05/12/2022 – Monday - Introduction

Part 1:

The workshop started with a lecture on the history of 3D Printing. The timeline of how 3D Printing came into existence was explained to the students and how 3D Printing technology became available to everyone. Comparisons of Additive, Subtracting and Formative Manufacturing were done to explain to students where 3D printing is used.

Case Study on Vacuum Forming was done to explain 3D Printing can save costs in manufacturing processes.

Part 2:

Fused Deposition Modelling was explained in a short summary. The various motion systems, extruder configurations, and the working of a 3D printer was explained. This included parts of a Hot end, Motion types and how a 3D printer prints. A live demo of 3D printing was also shown to students in small groups.

2. Day Two – 06/12/2022 – Tuesday – G-CODES AND M-CODES

The purpose and working of G-Codes and M-Codes was explained. This included the difference between G-Code and M-Code, Syntax of the codes and the various G-Code and M-Code commands that are used to drive the 3D printer. The process of generating G-Code was shown. The students were shown the G-Code of the first layer of a 20 mm Cube and the 3D Printing was shown to students in different batches. The purpose of explaining working of G-Code was to help students visualize how tool paths look like in code.

3. Day Three – 07/12/2022 – Wednesday – Slicing and Slicing Softwares

Shreeyash Pratishthan's
Shreeyash College of Engineering and Technology Aurangabad

Students will be explained the Algorithm of slicing, the process which converts the CAD model into a G-Code. The various components and principles of Slicing were explained [Mesh Geometry]. After this, the students were introduced to the various printing parameters that govern the 3D printing process. This includes orientation, infill, support generation, printing speeds, print paths, and more. The students were also given a demo on two Slicer Softwares: **Cura** and **Prusa Slicer**

4. Day Four – 08/12/2022 – Thursday – Common 3D Printing Materials and Hands-on practical session of Prusa Slicer

Part 1: Common 3D Printing Materials

The students were told about the various commonly used 3D Printing Materials used in the industry. Each Material was explained in terms of plasticity, melting points, nature of the material, advantages and limitations. The general applications of each material in the different sectors were also discussed. Moreover, the importance of fiber-based materials was also explained. Students were also shown samples of 3D Printed items in different materials.

Part 2: Hands-on Practical Session of Prusa Slicer

All students were taken to CAD/CAM lab where Prusa Slicer was already installed before on all systems. Students were taught how to setup the slicing workspace. This includes selecting the right 3D Printer from the library, material from the materials library, and importing STL files. After this different slicing exercises were carried out in slicing. Students could visualize G-Codes in the UI by varying printing parameters like infill density, layer heights, perimeter thickness, etc. Finally, students were taught how to export and save the G-

5. Day Five – 09/12/2022 – Friday- Business opportunities in 3D Printing and Pop Quiz

Students were explained different business opportunities in the area of 3D printing and the potential in the market. The business and innovation opportunities in the field of new materials development compatible with 3D printing. Opportunities for research in the area of novel mechanisms and materials development for 3D printing. They were then asked to attend a small quiz based on what they had learnt over the past few days.

Activity Report

Name of the event:	One week " Hands-on Workshop on 3D Printing and Business Opportunities"		
Date of the event:	5 th Dec. to 9 th Dec. 2022	Academic Year:	2022- 23
Class of Student participants:	Diploma,UG & PG students	Number of student participants:	65/day
Accompanying Staff:	All Staff of Mech. Engg.	Number of Faculty participants:	12

Summary of the event:

The Department of Mechanical Engineering and Institution's Innovation Council (IIC) of Shreeyash Pratishthan's Shreeyash College of Engineering & Technology Aurangabad, in collaboration with Ground-up Technologies Private Limited, Aurangabad have organised a **one week "hands-on workshop on 3D printing and business opportunities"** with a focus to provide hands-on training to students and faculties about 3D printing process, technologies, 3D printing parameters and essentially business opportunities.

The resource person was **Mr. Ameya V Deshpande**, Founder and Director of Ground-up Technologies Pvt. Ltd., Aurangabad, MH.

The program started with an opening remark delivered by Prof. B A Shukla, Asst. Professor, and Mechanical Engineering Department, followed by a welcome address from Prof. J S Shstri, HOD Electrical Engineering, and preamble by Dr. Hulas A Tondy, HOD Mechanical Engineering, Shreeyash Pratishthan's Shreeyash College of Engineering & Technology Aurangabad.

3D printing technologies were one of the unsung technologies. In many ways, the pandemic & market has put 3D printing on people's radar. As you are probably well aware, the 3D printing industry collectively produced a wide range of tools, masks, and devices to support the pandemic relief efforts. These efforts not only highlighted additive manufacturing's use in rapid prototyping but also showcased its potential power for full production of parts and products.

Our resource person **Mr. Ameya V Deshpande** has delivered the talk on 3D printing technologies based on well-designed contents and as per schedule.

The last session of training programme has ended with a round of discussion and vote of thanks by Prof. Z. A. Shaikh, Asst. Professor of the Department of Mechanical Engineering.

Objectives:

- To provide training and hands-on experience on 3D printing process.
- To train students and faculties about 3D CAD Modeling & Slicing Software.
- To provide knowledge about latest business opportunities in the field of 3D printing.

Shreeyash Pratishthan's Shreeyash College of Engineering & Technology, Aurangabad

- To provide knowledge about current research opportunities in the field of 3D printing.

Outcomes:

- The participants have been learnt about 3D printing processes and technologies.
- The participants have been trained in 3D CAD Modeling & Slicing Software.
- The participants have been trained to operate FDM 3D printing machine.
- They learnt about latest business opportunities in the area of additive manufacturing.

About Shreyash Pratishtan

Shreyash Pratishtan aims to provide an environment where young minds could be transformed into professionals. In addition to provide high quality education, we ensure all round development of students through soft skills training and close interaction with the industry for hands-on training. Our aim is to impart high degree of knowledge to the students with well designed extracurricular and emotional quotient related inputs, thus creating the desire and ability in students to learn, lead, excel and to become responsible and respected citizens.

About SYCET

Shreyash College of Engineering & Technology (SYCET) established in year 2008 has huge campus spread over 53 acres land and presently affiliated to Dr. Babasaheb Ambedkar Technological University, Lonere. SYCET is one of the premier Technical Institute in Marashtra state in the Un-Aided sector. It offers comprehensive education by developing the intellectual strength of the students and guiding them in teaching and learning so as to realize our vision as premier engineering institute. SYCET strives to set high standards through Quality Teaching, Research, Knowledge Management through specific, measurable, attainable, relevant, time-bound goals and continues improvement methodology. Our educational programs have been the cutting edge since their inception. The dedicated faculty and with human values certainly make SYCET as the institute of National importance. The modern computing facilities made available to the students are also sought, both by industry and the nation's most competitive graduate schools for conducting competitive examination. Our Master of Business Administration (MBA) Department is a leading B-school in Aurangabad having excellent infrastructure in the region. MBA at SYCET is approved by AICTE (Delhi), Government of Maharashtra and is affiliated to Dr. Babasaheb Ambedkar Marathwada University, Aurangbaad. SYCET offers high and teaching learning envirmment for students. It also offers experiential learning by providing well-equipped laboratories.

About FDP

FDP on Data Science is to be held on 20-24 February 2023. With rapid applications of technologies like Machine Learning and Artificial Intelligence, the concern to study and design the computer algorithms for concise representations of data, at multiple levels of abstraction is unavoidable. 90% of the world's data has been created in just past few years. With overwhelming volume of data, organization are struggling to extract the meaningful insights, they need to initiate wiser business decisions. Demand for data scientists crosses all industries as employers scramble to harness the power of data analytics to personalize their products, minimize the market risks and expand the business. The participants will be trained with hands-on approach in order to have an in-depth insight into the domain of Data Science and expose them to the new avenues of research and innovation.

Program Objectives

- 1] Disseminate the knowledge of data science with AI, Machine learning and deep learning.
- 2] Conceptual understanding of use of various data science techniques to innovate and improve the business process and its decisions.
- 3] Understanding of practical aspects of data science concepts via hands on sessions and laboratory sessions.

Detail Session Topics

- AI&ML with deep learning perspective
- ML Techniques
- Data extraction from different files and sources
- Different hands on session using Python & R Libraries.
- Probability Distribution
- Probabilistic Graphical Modeling
- Recommendation Systems
- Statistical modeling
- R programming Hands-on
- Few shot learning
- Different machine learning techniques
- Python hands-on sessions.
- Google analytics
- Data Visualization
- Python hands-on session.
- Big data analytics
- Python hands on session.
