Details of Mentor Mentee Program

1. Introduction: Mentoring is a great way to apply your knowledge and make a difference in students' lives. Mentor program provide guidance for a meaningful mentor relationship.

2. Mentor Program Expectations: The following are guidelines that will help you to have a successful mentoring partnership.

2.1. Maintain regular contact: Mentors and students should commit to speaking a minimum of once in a week. Although email is an important tool in mentoring, it cannot be substituted for actual, real-time conversation. Conversations may occur over the phone, via Skype (or similar software), and/or in person when possible.

2.2. Set clear and realistic goals: At the start of the mentoring partnership, mentors and students will have a conversation that addresses goals for both the mentor and student. Evaluate progress toward your goals.

2.3. Be responsive: Both mentors and students are expected to return calls and e-mails in a timely manner to each other.

2.4. Receive feedback: It is important that students be open to receiving feedback that is can did and delivered in a thoughtful and constructive way. If necessary, your mentor will help you learn how to receive and respond to feedback by modelling the behaviour through open discussion.

2.5. Participate in self-reflection and self-development: Expect thought provoking questions designed to help students understand and articulate motivations, accomplishments, weaknesses, etc.

3. Mentoring Goals:

- Develop professional expertise of student in a specific area of focus.
- Work on a specific academic goal of a student. Develop leadership abilities of the student.
- Develop communication skills of the student.
- Explore personal interests and abilities of the student.
- Guide the student about how to handle college-life-work balance.
- Explore future career paths and opportunities for the student.

4. Mentoring Skills for Mentors:

Following skills will help mentors to empower your student to think, reflect, and take the necessary action steps to realize his or her goals. Your objective should be to provide guidance and support.

- Actively listen
- Ask thought-provoking questions
- Role model behaviour
- Provide objective feedback and guidance
- Demonstrate critical thinking

- ① A electric vehicle (EV) is one that operates on an electric motor, instead of an internal-combustion engine that generates power by ~~f~~ burning a mix of fuel and gases.
- ② Therefore, such as vehicle is seen as a possible replacement for current-generation automobile in order to address the issue of rising pollution global warming, depleting natural resources etc.
- ③ In India, the first concrete decision to incentivise electric vehicles was taken in 2010. According to a Rs 95-crore ~~st~~ scheme approved by the ministry of New and Renewable Energy (MNRE), the government announced a financial incentive for manufactures of electric vehicles sold in India.
- ④ The scheme effective from November 2010, envisaged incentives of up to 20 percent of ex-factory prices of vehicles, subject to a maximum limit.

EV policy framework in India

EV: India market key opportunity

- EV adoption in India is starting to see traction, aligned with global trends but with a different segmented mix.
- Growth in e2W and e3W segment is driven by favorable TCO normative but growth in e4W and e-bus segments driven majorly by Government push for clean mobility.
- Clean mobility has emerged as a focus area as the Government endeavors to meet its Paris climate change Agreement (2015) to cut Green House emission intensity of its GDP by 33-35%.
- Central Government initiatives (FAME II, MORTH regulations around EV) are being complemented by state EV policies.

A smart grid is an electrical grid which includes a variety of operation and energy measures including:-

- Advanced metering infrastructure (of which smart meters are a generic name for any utility side device even if it is more capable e.g. a fiber optic router)

- - Smart distribution boards and circuit breakers integrated with home control and demand response (behind the meter from a utility perspective)

- Load control switches and smart appliances, often financed by efficiency gains on municipal programs (e.g. pace financing)

- Renewable energy sources, including the capacity to charge parked (electric vehicle) batteries or larger arrays of batteries recycled from these, or other energy storage

- - Energy efficient resources

- Sufficient utility grade fiber broadband ~~as~~ to connect and monitor the above, with wireless as a backup. Sufficient spare or "dark" capacity to ensure failover, often leased for revenue.

Advantages of online education system

① Efficiency

Online learning offers teachers and efficient way to deliver lessons to students. Online learning has a number of tools such as videos, PDFs, podcasts, and teachers can use all these tools as part of their lesson plans.

② Accessibility of Time And place

Another advantage of online education is that it allows students to attend classes from any location of the choice. It also allows schools to reach out to a more extensive network of students, instead of being restricted by geographical boundaries.

③ Affordability

Another advantage of online learning is reduced financial costs. Online education is far more affordable as compared to physical learning.

④ Improved student Attendance

Since online classes can be taken from home or location of choice, there are fewer chances of students missing out of lessons.

Losses of online education system

- ① Online student feedback is limited
- ② E-learning can cause social isolation.
- ③ E-learning requires strong self-motivation and time management skills.
- ④ Lack of communicational skill development in online students
- ⑤ Cheating prevention during online assess assessments is complicated.

Offline disadvantages and losses

* disadvantages :-

- ① Traveling expenses
- ② fixed schedule
- ③ longer schedules
- ④ Expensive mode of study
- ⑤ Lectures once delivered cannot be repeated.
- ⑥ Loss in studies.
- ⑦ Lack of advanced technology
- ⑧ Dependency on teachers.

losses :-

Student and teachers can communicate.

- activity in offline classes. Students can participate in discussions and debates to help them learn more effectively. when a certain subject is taught at the same time. It assists students in resolving their doubts and identifying their mistakes. face to face teaching can assist teachers in interpreting student's body language, to see if they are interested.
